

.521 SILHOUETTE PANTS

Pre-soaked pants for advanced cellulite imperfections

Cosmetic treatment formulated to act against the imperfections caused by cellulite, even at an advanced level. Its formula contains an innovative delivery system that encapsulates Phosphatidylcholine which, thanks to its properties, is able to dissolve fat by reducing the size of adipocytes. Associated with Caffeine and Carnitine, it promotes the metabolism of fatty acids, counteracting their accumulation in adipose tissue. Its formula is also enriched with the Collagenase enzyme which promotes the rupture of the amorphous collagen bundles which, by compressing the adipocytes, contribute to the formation of fibrous nodules.

COMPOSITION: Microfibra 50 DEN

MAIN ACTIVE INGREDIENTS

PHOSPHATIDYLCHOLINE

It is one of the most abundant phospholipids in tissues. Thanks to its properties it is able to dissolve fat by reducing the size of adipocytes.

CAFFEINE

One of the most effective active ingredients in body treatments thanks to its lipolytic action. It is in fact capable of promoting the degradation of the triglycerides present in the adipocytes, causing

their volume to be reduced. It also has strong antioxidant properties.

CARNITINE

Naturally contained in the cells of our body, this substance intervenes in the cellular processes of energy production, promoting the burning of fat.

COLLAGENASE

Enzyme of the metalloprotease group capable of cutting the peptide bonds present in collagen. Specifically, it in-

tervenes in the breakdown of defective collagen fibers which, on the one hand, by compressing the fat cells lead to the formation of fibrous nodules and, on the other, by exerting traction on the skin, causing the so-called "orange peel" effect. The result is therefore a real restructuring of the skin and a consequent smoothing and toning effect.
