

ADVANCED ANTI-AGE CREAM

Skin Growth Factor & Phytosan

A specific anti-age face cream that is rich in active ingredients, designed to reduce the formation of new wrinkles due to ageing and dehydration. Their properties help counteract the factors that cause the skin's natural ageing process by promoting cell regeneration and the stimulation of new collagen and elastin.

PROBLEMS

- Deep wrinkles and expression lines
- Slowed cell renewal Ageing
- Loss of tone

EFFECTS

- Rejuvenation
- Tissue renovation and repair
- Compactness

Airless 100 ml

Cod. Art.: ARO205011

MAIN ACTIVE INGREDIENTS

EPIDERMAL GROWTH FACTORS (Crocus Chrysanthus)

Stimulates biological skin growth factors, helps rejuvenate skin tissue, counteracts the ageing process, improves skin tone

resistance, along with stimulating the production of collagen and elastin.

PHYTOCYANE (Soy Isoflavones)

Stimulate repair in the DNA and prevent damage caused by UV rays.

HYALURONIC ACID

A hyaluronic acid with high molecular weight that ensures a significant moisturising and film-forming action.

INSTRUCTIONS
